SUNY Student Assembly Monthly Report

A. What communications have you had this month both internal and external?

- The State Operated Campuses Committee has formally met 2 times. At the meetings, we developed the framework for the year and mapped out our initiatives, two of which include food insecurity and child care. We had an outreach survey to our campuses that allowed us to gain feedback on how our constituencies see our role as a committee in the upcoming year. Each representative has been in contact with all of their campuses, with few exceptions, according to our internal 'campus update form.

B. What has your committee achieved?

- We have successfully developed a framework for the year, with two major overarching initiatives. I believe it is a success to have almost all of our campuses responding to our correspondence. Additionally, our survey elicited responses from 47% of SUNY State Operated Campuses.

C. What are your goals going into the next meeting?

- I'd like to see some significant progress on the 'child care spreadsheet' and 'food insecurity spreadsheet' which will inform us of campuses with strong programs to address these issues.

D. What meetings have you attended this month? How many meetings have you had?

- Two formal meetings, one 'update form' in place of a third meeting.

E. How is your meeting attendance?

- Good, though there are two representatives that have continually missed without excuse. We're choosing a new meeting time to better accommodate schedules during the academic year.

F. How is the upkeep of your Facebook page? What posts have been successful? Has there been any meaningful discussion?

- I have just been given administrative access. I have encouraged representatives and SGA members already in the group to invite their constituents and peers.

G. What have you achieved so far as a Chair/Director? How does this align with your POA?

- Again, I see developing overarching issues to address this early on is an achievement. I hope that focusing on the issues of child care and food insecurity for the entire year will yield some results.

H. Additional comments:

- N/A
